

IceCube Polar Science Workshop

Tuesday 19 January 2021

Englacial heterogeneities and structures & bedrock properties (16:05-17:45)

-Conveners: Ilka Weikusat

time	[id] title	presenter
16:05	[27] Characterising the regional glaciological context for relevance for IceCube-Gen-2	EISEN, Olaf
16:25	[2] HOW WARM IS THE SOUTH POLE?	Prof. TALALAY, Pavel G.
16:45	[15] Ice-dynamic implications of geophysical studies upstream of South Pole	BESSON, David LILIEN, David
17:05	[22] BedMachine: mapping the bed under the Antarctic ice sheet by combining sparse radar data and mass conservation	MORLIGHEM, Mathieu
17:25	[26] Analysis of Surface Motion with South Pole Campus	BLAISDELL, George
