Progress of Antarctic Survey Telescopes(AST3) project

Thursday, 9 September 2021 13:15 (15 minutes)

The trio Antarctic Survey Telescopes(AST3) project is the second generation optical telescopes designed to run on Dome A. The first two telescopes have deployed and operated at Dome A since 2012 and 2015. The third one is now at domestic commissioning stage at Yaoan observatory in Yunnan province, China. This talk will give some details about the latest progress of the project.
