Neutrino Measurements in the Making

Monday, 13 May 2013 15:10 (20 minutes)

There are a number of options utilizing the NuMI neutrino beam which are being looked at, which can provide information on ΔCP and even the mass hierarchy, in the next decade. CHIPS (WC) and GLADE (LAr) and also LAr MC benchmarking experiment Lariat could be placed in the NuMI beam.

Presenter: THOMAS, Jenny (University College of London)

Session Classification: Accelerator-Based Neutrino Physics I
